## **Solution Manager**

When you configure  
SAP Solution

Manager initially, you  
need to create your  
configuration user  
(user type: dialog  
user). Per default this  
user is called  
SOLMAN\_ADMIN .

You can use the  
default user name,  
but you can also use  
any other user name.

Configuration  
Validation in SAP

# Read Book Sap Solution

Solution Manager enables you to determine whether the systems in your landscape are configured consistently and in accordance with your requirements. You can check the current configuration of a system in your landscape using a defined target state

# Read Book Sap Solution

(target system) or compare it with an existing system.

## **Configuration**

### **Validation - SAP**

Solution Manager is using SAP BW for reporting purposes.

You can use either the current client of Solution Manager or you can define another SAP BW

# Read Book Sap Solution

Manager. In “3- Set Up  
SAP BW” step you  
firstly confirm the BW  
system, then create  
BW users and in the  
last substep you  
execute automatic  
activities.
