This volume presents the most current theoretical advances in the fields of social marketing and public health communications. The volume is divided in two parts. Part 1 contains chapters pertaining to research and theory reflecting improvements and contributions to theories that help improving quality of life. It includes literature reviews, conceptual research and empirical studies on social marketing communications, models to understand individual's risky behaviors, and how to improve social interventions. The second part emphasizes applied research, consisting of best practices, applied experiments, and case studies on social marketing innovative practices with implications for quality of life.

Revealing essential roles of the tumor microenvironment in cancer progression, this book provides a comprehensive overview of the latest research in the field. A variety of topics are covered, including metabolism in the tumor microenvironment, stellate cells and endothelial progenitors in the tumor microenvironment, as well as the effects of HIV, viral hepatitis, and inflammation in the tumor microenvironment, and more. Taken alongside its companion volumes, Tumor Microenvironment: State of the Science updates us on what we know about various aspects of the tumor microenvironment, as well as future directions. This book is essential reading for advanced cell biology and cancer biology students as well as researchers seeking an update on research in the tumor microenvironment.
