A surprising true story of Isaac Newton's boyhood suggests an intellectual development owing as much to magic as science. Before Isaac Newton became the father of physics, an accomplished mathematician, or a leader of the scientific revolution, he was a boy living in an apothecary's house, observing and experimenting, recording his observations of the world in a tiny notebook. As a young genius living in a time before science as we know it existed, Isaac studied the few books he could get his hands on, built handmade machines, and experimented with alchemy—a process of chemical reactions that seemed, at the time, to be magical. Mary Losure's riveting narrative nonfiction account of Isaac's early life traces his development as a thinker from his childhood, in friendly prose that will capture the attention of today's budding scientists—as if by magic. Back matter includes an afterword, an author's note, source notes, and a bibliography.

Isaac Titsingh was intermittently head of the Japan factory (trading station) of the Dutch East India Company 1780-94. He was a career merchant, but unusual in having a classical education and training as a physician. His impact in Japan was enormous, but he left disappointed in the ability of the country to embrace change. After many years in Java, India and China, he came to London, and then settled in Paris where he devoted himself to compiling translations of prime Japanese texts. It is one of the most exciting anthologies of the period and reveals the almost unknown world of eighteenth-century Japan, discussing politics, history, poetry and rituals. The Illustrations of Japan appeared posthumously in 1821-1822 in English, French and Dutch. This fully annotated edition makes the original English version available for the first time in nearly two centuries

Nobel Prize-winning author Isaac Bashevis Singer stands virtually alone among prominent writers for being more widely known through translations of his work than through the original texts. Yet readers and critics of the Yiddish originals have long pointed out that the English versions are generally shortened, often shorn of much description and religious matter, and their perspectives and denouements are significantly altered. In short, they turn the Yiddish author into a Jewish-American English writer, detached from of his Eastern European Jewish literary and cultural roots. By contrast, this collection of essays by leading Yiddish scholars seeks to recover the authentic voice and vision of the writer known to his Yiddish readers as Yitskhok Bashevis. The essays are grouped around four themes: The Yiddish language and the Yiddish cultural experience in Bashevis's writings Thematic approaches to the study of Bashevis's literature Bashevis's interface with other times and cultures Interpretations of Bashevis's autobiographical writings A special feature of this volume is the inclusion of Joseph Sherman's new, faithful translation of a chapter from Bashevis's Yiddish "underworld" novel Yarme and Keyle.

"In this heartfelt tale of labor and love, Ernst produces one of her most winning combinations of historical evocation and clever mystery." It doesn't help that her boyfriend, Roelke McKenna, has been troubled for weeks and won't say why. Chloe hopes a consulting job at Green Bay's Heritage Hill Historical Park, where an old Belgian-American farmhouse is being restored, will be a relaxing escape. Instead she discovers a body in a century-old bake oven. Chloe's research suggests that a rare and valuable piece of lace made its way to nearby Door County, Wisconsin, with the earliest Belgian settlers. More importantly, someone is desperate to find it. Inspired by a courageous Belgian woman who survived cholera, famine, and the Great Fire, Chloe must untangle clues to reveal secrets old and new...before the killer strikes again.
