Giallo - short story (17 pagine) - When a desperate Inspector Lestrade appeals to Sherlock Holmes for help, the great detective decides to risk much more than his reputation. Once again he keeps Doctor Watson in the dark, as he dons a disguise and embarks on a mysterious and dangerous mission. Paul D. Gilbert was born in 1954 and has lived in and around London throughout this time. He has been married to Jackie for 40 years and she has always shared

his great passion for Sherlock Holmes! They have two sons, one of whom farms in Spain. He has been in clothing retail for most of his working life, although he is now an undertaker. He has a passion for ancient history and he enjoys music, sport and movies. His remaining ambition is to be able to write full time; he enjoys the process so much. Among his books: The Lost Files of Sherlock Holmes (2007), The Chronicles of Sherlock Holmes (2009), Sherlock Holmes and the Giant Rat of Sumatra (2011), The Annals of Sherlock Holmes (2013) Sherlock Holmes and the Unholy Trinity (2015) and Sherlock Holmes: The Four Handed Game (2017).

A missionary woman has disappeared in Spitalfields, one of London's most dangerous districts. When Sherlock Holmes is called on to find her, he discovers enormous, highly intelligent rats have made their home under the streets of London. Holmes is forced to confront the horrors of his past and science gone mad. Word of this phenomenon draws the attention of rising zoologist G.E. Challenger, who decides he must meet the creatures' creator, one Dr. Moreau. As in the author's 'Never Meant to Be', the worlds of Sherlock Holmes and H.G. Wells once again come together, this time to uncover the truth behind the Giant Rat of Sumatra.

Sabina Carpenter and John Quincannon are no stranger to mysteries. In the five years since they opened Carpenter and Quincannon, Professional Detective Services, they have solved dozens, but one has eluded even them! Sherlock Holmes or, rather, the madman claiming his identity, who keeps showing up with a frustrating (though admittedly useful) knack for solving difficult cases. Roland W. Fairchild, recently arrived from Chicago, claims Holmes is his first cousin, Charles P. Fairchild III. Now, with his father dead, Charles stands to inherit an estate of over three million dollars-if Sabina can find him, and if he can be proved sane. Sabina is uncertain of Roland's motives, but agrees to take the case. John, meanwhile, has been hired by the owner of the Golden State brewery to investigate the "accidental" death of the head brewmaster, who drowned in a vat of his own beer. When a second murder occurs, and the murderer escapes from under his nose, John finds himself on the trail not just of the criminals, but of his reputation for catching them. But while John is certain he can catch his quarry, Sabina is less certain she wants to catch hers. Holmes has been frustrating, but useful, even kind. She is quite certain he is mad, and quite uncertain what will happen when he is confronted with the truth. Does every mystery need to be solved? Bombay, 1896. A serial killer is on the loose. In Room 000, detectives struggle to snare the culprit, but this murderer is always one step ahead of them. When death is a contagion that spreads from house to house and from street to street, where does one look for clues? As the investigators in Room 000, armed with microscopes and cultures, track the killer, they invent a new science. But the Raj imprisons Bombay in antiquated disciplines that turn the plague into an epic tragedy. Room 000 takes a Holmesian look at the Bombay Plague. In these pages, you'll meet the Argyl Street Irregulars, share the anxieties of the Reluctant Ephemerist, thrill to the discoveries of the Solitary Scientist, and shudder over the repulsive story of the Red Leech. Here too, is Tatya Lakshman, the first Indian detective of the Bombay Police in hot pursuit of the Parsi Plague Current. In their signature style, Kalpish Ratna meld science and adventure into intrigue and mystery. The forgotten truths of the Bombay Plague, seen from this very human perspective, will compel us to look at today's emerging epidemics in an entirely new light.
