(C637) - CIRIA~~

Soil nailing is a technique where either natural ground or fill material is reinforced by the insertion of slender tension-carrying elements called soil nails. A soil-nailed slope or wall usually consists of the soil nails themselves, a

Access Free Soil Nailing

hard, flexible or soft facing to the slope or wall surface, and surface water and sub-surface drainage systems. Soil nailing has become a relatively common method of slope stabilisation and retention.
