This was a great text for me, however I also had the added benefit of having Professor Sanford Klein as
my instructor for Thermodynamics. The text focuses HEAVILY on the use of a computer software called
Engineering Equation Solver (EES) which Klein developed. Now, if you know how to properly use EES, it
is a fantastic tool and the book is incredible. On the other hand, if your professor isn't ...

Professor Klein's current research interests are in thermodynamics, refrigeration, and solar energy applications. In addition, he has also actively involved in the development of engineering computer tools for both instruction and research. He is the primary author of the TRNSYS (TRaNsient SYSystem) simulation program that is widely used for solar energy system studies. He also is the author ...

I took the Thermodynamics class that Mr. Klein taught at UW-Madison. This is the first edition of the book and also it was the first time he was using it for a class. Overall the book has a practical solved example problems, all of which are solved in EES, which is great. The downside is that there aren't enough examples.
