Optimization by

Neural Networks

The solution space, denoted S , is the finite set of all possible solutions. The cost function, denoted by g , is a mapping from the set of solutions to real numbers, that is, $g: S \rightarrow \mathbb{R}$ [Aarts and

Read Free Solutions To

Korst 89]. In the case of minimization, the problem is to find a solution $S^* \in S$, called globally-optimal solution, which satisfies $S_g S S i i^* = \min$

Questions

In the last two
decades the artificial
neural networks have
been refined and
widely used by the
researchers and
application engineers.
We have not
witnessed such a

Read Free Solutions To

large degree of evolution in any other artificial neural network as in the Adaptive Resonance Theory (ART) neural network. The ART network remains plastic, or adaptive, in response to significant events and yet remains stable in response to irrelevant events. This stability-

Read Free Solutions To

plasticity property is a great step towards realizing intelligent machines capable of autonomous learning in real time environment. The main aim of this book is to report a very small sample of the research on the evolution of ART neural network and its applications.
