Business Benchmark helps students get ahead with their Business English vocabulary and skills and gives them grammar practice in business contexts. The Student's Book provides lower intermediate level students with essential business language and vocabulary, and provides training and practice for the BEC Preliminary exam, using real BEC exam tasks provided by Cambridge ESOL. This version is available in German-speaking markets only.

A narrative exploration of the American Revolution in the context of the African-American experience analyzes questions about what freedom and democracy mean for black Americans, covering such topics as the tasks faced by freedom-seeking slaves, the revolutionary nature of abolitionist sentiments and how slaves remembered the Revolution.

In *Mounting Frustration* Susan E. Cahan uncovers the moment when the civil rights movement reached New York City's elite art galleries. Focusing on three controversial exhibitions that integrated African American culture and art, Cahan shows how the art world's racial politics is

"Lethen brilliantly interprets New Objectivity as a tactical response to the need for a 'code of conduct' in an age of anxiety about values and normative judgments. Moving effortlessly between analysis of philosophical texts and literary works, he charts an increasingly popular field of cultural studies: how cultural discourses shape behavior. One of the most original and daring contributions to Weimar scholarship and to the study of modernity in general in a decade."—Anton Kaes, University of California, Berkeley "Lethen is probably the most original and outstanding scholar writing in German today about Weimar literature and culture. He traces the figure of the 'cold persona' as part of a broader discourse of anthropological, ethical, and aesthetic dimensions. The book is written in a personal voice, witty, lucid, and unpretentious."—Miriam Hansen, University of Chicago

WinXSPRO is an interactive Windows software package designed to analyze stream channel cross section data for geometric, hydraulic, and sediment transport parameters. WinXSPRO was specifically developed for use in high-gradient streams (gradient > 0.01) and supports four alternative resistance equations for computing boundary roughness and resistance to flow. Cross section input data may be from standard cross section surveys using a rod and level or sag-tape procedures. WinXSPRO allows the user to subdivide the channel cross section into multiple sub-sections and has the ability to vary watersurface slopes with discharge to reflect natural conditions. Analysis options include developing stage-discharge relationships, evaluating changes in channel cross-sectional area, and computing sediment transport rates. Resource specialists can use the estimated stream-channel geometry cross section hydraulic characteristics and sediment transport output to assist with channel design and monitoring, instream flow analysis, the restoration of riparian areas, and the placement of instream structures.
