The Christian Delusion by John W. Loftus "The Christian Delusion" is an extension of sorts to his previous great book "Why I Became an Atheist" but instead of going solo this time around John Loftus brings along some of his friends and these are good friends to have. A series of interesting essays by fantastic authors that support the main thesis of the book, that Christianity is a false belief.

The Christian Delusion Why Faith Fails

One area where I found myself agreeing with Dawkins was in his reaction to the extremism that some religious believers can display. He gives many examples throughout the book of the inconsistent beliefs and inappropriate behaviour of those who call themselves religious.

In this anthology of recent criticisms aimed at the reasonableness of Christian belief, former evangelical minister and apologist Loftus has assembled fifteen outstanding articles by leading skeptics, expanding on themes introduced in Loftus' first book.

Is faith delusion? Is religion bad for your health? How, in a scientifically and technologically advanced age, can people still believe in God/spirit/'other'? Clearly not all believers are primitive and ill-educated; an alternative explanation is that they must be mad, or at least severely neurotic (as suggested by Freud). This book starts by looking at, and giving reasons for, the connection and the division between Christian faith and psychiatry. It asks whether science challenges Christians involved with psychiatry, as patients or professionals, and whether the spiritual needs of patients are recognised. The author examines the scope and use of the neuro-sciences and considers cause and effect, natural selection and determinism. He explores the overlap (and the difference) between psychiatric symptoms and religious belief, the possible association between demon possession and mental illness, and the idea that some people are intrinsically religious and some are not. The variations of personality are examined, with their implications for belief. Posited as a statement, that faith is delusion is always hostile, but outcome studies (reviewed here) show that in general religious belief and practice convey good mental health. Religious faith and mental illness are different, and their concepts come from different world-views. A consideration of them in relation to each other is long overdue. The author is a former Professor of Psychiatry and President of the Royal College of Psychiatrists, and has also been Chairman of their Spirituality and Psychiatry Special Interest Group, so is exceptionally well qualified to address the subject. Although the book is technically proficient, it is aimed at the general reader and is illustrated with stories, brief case histories and anecdotes.

At a time when the vast diversity of human belief systems is accessible to all, the outsider test for faith offers a rational means for fostering mutual understanding. It's important that people understand findings from psychology, anthropology, sociology, and neuroscience to escape

the notion that any one religion represents the only truth.

For about two decades John W. Loftus was a devout evangelical Christian, an ordained minister of the Church of Christ, and an ardent apologist for Christianity. With three degrees--in philosophy, theology, and philosophy of religion--he was adept at using rational argumentation to defend the faith. But over the years, doubts about the credibility of key Christian tenets began to creep into his thinking. By the late 1990s he experienced a full-blown crisis of faith. In this honest appraisal of his journey from believer to atheist, the author carefully explains the experiences and the reasoning process that led him to reject religious belief. The original edition of this book was published in 2006 and reissued in 2008. Since that time, Loftus has received a good deal of critical feedback from Christians and skeptics alike. In this revised and expanded edition, the author addresses criticisms of the original, adds new argumentation and references, and refines his presentation. For every issue he succinctly summarizes the various points of view and provides references for further reading. In conclusion, he describes the implications of life without belief in God, some liberating, some sobering. This frank critique of Christian belief from a former insider will interest freethinkers as well as anyone with doubts about the claims of religion.

In this successor to his critically acclaimed anthology, *The Christian Delusion: Why Faith Fails*, a former minister and now leading atheist spokesperson has assembled a stellar group of respected scholars to continue the critique of Christianity begun in the first volume. Contributors include Victor Stenger, Robert Price, Hector Avalos, Richard Carrier, Keith Parsons, David Eller, and Taner Edis. Loftus is also the author of the best-selling *Why I Became an Atheist: A Former Preacher Rejects Christianity*. Taken together, the Loftus trilogy poses formidable challenges to claims for the rationality of the Christian faith. Anyone with an interest in the philosophy of religion will find this compilation to be intellectually stimulating and deeply thought provoking.

Perhaps the most persistent question in human history is whether or not there is a God. Intelligent people on both sides of the issue have argued, sometimes with deep rancor and bitterness, for generations. The issue can't be decided by another apologetics book, but the conversation can continue and help each side understand the perspectives of the other. In this unique book, atheist John Loftus and theist Randal Rauser engage in twenty short debates that consider Christianity, the existence of God, and unbelief from a variety of angles. Each concise debate centers on a proposition to be resolved, with either John or Randal arguing in the affirmative and the opponent the negative, and can be read in short bits or big bites. This is the perfect book for Christians and their atheist or agnostic friends to read together, and encourages honest, open, and candid debate on the most important issues of life and faith.

The *God Delusion* caused a sensation when it was published in 2006. Within weeks it became the most hotly debated topic, with Dawkins himself branded as either saint or sinner for presenting his hard-hitting, impassioned rebuttal of religion of all types. His argument could hardly be more topical. While Europe is becoming increasingly secularized, the rise of religious fundamentalism, whether in the Middle East or Middle America, is dramatically and dangerously dividing opinion around the world. In America, and elsewhere, a vigorous dispute between 'intelligent design' and Darwinism is seriously undermining and restricting the teaching of science. In many countries religious dogma from medieval times still serves to abuse basic human rights such as women's and gay rights. And all from a belief in a God whose existence lacks evidence of any kind. Dawkins attacks God in all his forms. He eviscerates the major arguments for religion and demonstrates the supreme improbability of a

Get Free The Christian Delusion Why Faith Fails John W Loftus

supreme being. He shows how religion fuels war, foments bigotry and abuses children. The God Delusion is a brilliantly argued, fascinating polemic that will be required reading for anyone interested in this most emotional and important subject.

Alister McGrath and Joanna Collicutt McGrath present a reliable assessment of The God Delusion by Richard Dawkins, famed atheist and scientist, and the many questions this book raises--including, above all, the relevance of faith and the quest for meaning.

The Bible is the most overrated book in the world, and Jesus of Nazareth the most overrated person in world history. These are some of the propositions which the author, who has a doctorate in theology, formulates in his examination of the Christian religion. In a very readable and often humorous style the book asks whether the Bible really is such a good, ethically valuable book, as the Churches always claim, or whether the God of the Old Testament is not rather an irascible war god while the New Testament announces the destruction of all unbelievers at the end times: "He that believeth and is baptized shall be saved; but he that believeth not shall be damned" (Mark 16: 16). The book also asks whether the Churches are right to invoke that Jesus of Nazareth whom they announce as the Son of God. After all, academic research has long established that the real Jesus was very different and had almost nothing in common with the Jesus of the Churches. Christianity has been driving through history without a driver's licence. This book is addressed both to believers who do not shy away from confronting uncomfortable facts, and to those people who have nothing to do with the Church and who have always suspected that something in Christianity is not quite right.

According to recent polls, the number of atheists and agnostics has more than doubled in the United States in the last twenty years. A coterie of their intellectual spokesmen have mounted a multifaceted attack on the Christian faith in a book entitled The Christian Delusion, which the atheist philosopher, Michael Martin, described as "arguably the best critique of the Christian faith the world has ever known." Dr. Hanna dismantles their arguments one by one, not only clearly exposing the fallaciousness of their contentions but also indicating how their failed case carries implications that furnish positive support for biblical Christianity. This book is more than a set of refutations; it provides a wide-ranging theological and philosophical purview that both biblical theists and anti-Christians need to take seriously, not only in order to understand the current debates but also to reflect on crucial issues relevant to one's own life and destiny.

Mark

M. Hanna, now devoting full time to writing, was a professor of philosophy for many years at California State University and Talbot School of Theology. He also taught at the University of Southern California, where he earned M.A. degrees in philosophy and world religions and a Ph.D. in philosophy. He lived in the Middle East for four years, earning his B.A. at the American University in Beirut. He has lectured in numerous universities and theological schools around the world. He is the author of Crucial Questions in Apologetics and The True Path: Seven Muslims Make Their Greatest Discovery. ***** "This is masterly and brilliant...." --Norman L. Geisler, Ph.D. "A devastating critique of the critics...." --Gary R. Habermas, Ph.D. "A stunning achievement...It is a model of irenic, tough-minded, well-informed argumentation...." --J. P. Moreland, Ph.D. "Give this book a careful reading" --Dallas Willard, Ph.D
