Following his vision of the coming Messiah, the prophet Daniel creates a select group of men who will count down the calendar to the arrival of Israel's promised king. Centuries later, as the day nears, Myrad, a young magi acolyte, flees for his life when his adoptive father and others are put to death by a ruthless Parthian queen. Having grabbed only a few possessions, Myrad escapes the city, and searching for a way to hide from the soldiers scouring the trade routes, he tries to join the caravan of the merchant Walagash. The merchant senses that Myrad is hiding secrets, but when the young man proves himself a valuable traveler, an epic journey filled with peril, close escapes, and dangerous battles begins. With every day that passes, the calendar creeps closer to the coming Messiah. And over everything shines the dream of a star that Myrad can't forget and the promise that the world will never be the same.

This text contains sufficient material for a single semester core course in electric machines and energy conversion, while allowing some selectivity among the topics covered by the latter sections of Chapters 3-7 depending on a school's curriculum. The text can work for either a course in energy design principles and analysis with an optional design project, or for a capstone design course that follows an introductory course in energy device principles. A unique feature of "Electric Machines: Analysis and Design Applying MATLAB" is its integration of the popular interactive computer software MATLAB to handle the tedious calculations arising in electric machine analysis. As a result, more exact models of devices can be retained for analysis rather than the approximate models commonly introduced for the sake of computational simplicity.

First there was "Buffy the Vampire Slayer"; then its spin-off "Angel"; then the cult hit "Firefly"; and its follow-up film, "Serenity." They all had two things in common: their creator, Joss Whedon ... and their surprising psychological depth. Revisit the worlds of Joss Whedon ... with trained psychologists at your side. What are the psychological effects of constantly fighting for your life? Why is neuroscience the Whedonverse's most terrifying villain? How can watching Joss's shows help you take on your own psychological issues? It's all the best parts of Psych 101—without Professor Walsh. \* Robert Kurzban explains how Mal's morals are a form of evolutionary pornography, and why we like to watch \* Thomas Flansom explores free will in the Whedonverse—with prophecies, sacred duties and the long arm of the Alliance, does anyone actually have any? \* Carole Poole demonstrates how Buffy and Spike's season six relationship could be considered metaphor for narcissistic personality disorder—and concludes that Buffy may have been better off continuing it \* Bradley J. Daniels looks at River's Alliance-altered brain, and the real effects of "stripping" the amygdala \* Mikhail Lyubansky shows why, psychologically, death really is Buffy's gift \* And editor Joy Davidson takes on Angel's mommy issues—how the course of his whole extraordinary existence can be traced back to the woman who made him a vampire
