Web Of Life Producer To Predator Answers - seapa.org  
Every ecosystem is made up of three broad components: producers, consumers and decomposers. Producers are organisms that create food from inorganic matter. The best examples of producers are plants, lichens and algae, which convert water, sunlight and carbon dioxide into carbohydrates. Consumers are organisms that cannot create their food.

Web Of Life Producer To Predator Answers  
calls out one component of the Web of Life, either producer, consumer, decomposer, or non-living. All species that fit in the component named, must run to that corner. For example, if "producer" is called, then all plants go to the corner where the producer sign is. The "Sun" repeats this procedure until all groups are separated into the four corners. 4.
