Updated on: 10 Apr 2019 by Akash Peshin. Einstein believed that the Universe was an infinitely large, all-encompassing blimp. His General Theory of Relativity suggested a model of a Universe that was homogenous, spatially curved and dominated by a single force – gravity. However, if gravity alone sculpts the structure of the Cosmos, then all matter in it must be impelled to be mutually attracted towards each other rendering the Universe to crumble under its own weight.

~~Why Is The Universe Expanding? – Science ABC~~

Whether you believe in Divine evolution or the Big Bang Theory, the universe came into being. It has been, it is, and it will be. There is nothing we can do about it. Some believe that we through global warming effect the cosmos, others do not. But either way time and space are a continuum. We as humans will continue to look to the heavens and explore.

~~Why is the Universe the way it is? – Quora~~

The universe is more than 13 billions years old which suggests very low energies. The instant after the Big Bang, know as Inflation, was a period of massive energy and expansion but the negative...
