A hands-on guide for anyone who teaches writing to students with learning disabilities This valuable resource helps teachers who want to sharpen their skills in analyzing and teaching writing to students with learning disabilities. The classroom-tested, research-proven strategies offered in this book work with all struggling students who have difficulties with writing—even those who have not been classified as learning disabled. The book offers a review of basic skills—spelling, punctuation, and capitalization—and includes instructional strategies to help children who struggle with these basics. The authors provide numerous approaches for enhancing student performance in written expression. They explore the most common reasons students are reluctant to write and offer helpful suggestions for motivating them. Includes a much-needed guide for teaching and assessing writing skills with children with learning disabilities Contains strategies for working with all students that struggle with writing Offers classroom-tested strategies, helpful information, 100+ writing samples with guidelines for analysis, and handy progress-monitoring charts Includes ideas for motivating reluctant writers Mather is an expert in the field of learning disabilities and is the best-selling author of Essentials of Woodcock-Johnson III Tests of Achievement Assessment

Highly practical and accessible, this indispensable book provides clear-cut strategies for improving K-12 writing instruction. The contributors are leading authorities who demonstrate proven ways to teach different aspects of writing, with chapters on planning, revision, sentence construction, handwriting, spelling, and motivation. The use of the Internet in instruction is addressed, and exemplary approaches to teaching English-language learners and students with special needs are discussed. The book also offers best-practice guidelines for designing an effective writing program. Focusing on everyday applications of current scientific research, the book features many illustrative case examples and vignettes.

This unique book focuses on how to provide effective instruction to K-12 students who find writing challenging, including English language learners and those with learning disabilities or language impairments. Prominent experts illuminate the nature of writing difficulties and offer practical suggestions for building students' skills at the word, sentence, and text levels. Topics include writing workshop instruction; strategies to support the writing process, motivation, and self-regulation; composing in the content areas; classroom technologies; spelling instruction for diverse learners; and assessment approaches. Every chapter is grounded in research and geared to the real-world needs of inservice and preservice teachers in general and special education settings.

Many English language learners (ELLs) require extra support to become successful writers. This book helps teachers understand the unique needs of ELLs and promote their achievement by adapting the effective instructional methods teachers already know. Engaging and accessible, the book features standards-based lesson planning ideas, examples of student work, and 15 reproducible worksheets, rubrics, and other useful materials. It describes ways to combine instruction in core skills with ample opportunities to write and revise in different genres. Invaluable guidance is provided for assessing ELLs' writing development at different grade levels and language proficiency levels.

Many universities support writing assessment programs. These same universities also have writing instruction programs, which might include writing centers, writing-across-the-curriculum initiatives, and freshman composition programs. This book fully analyzes the nationally recognized writing-assessment and instruction program at Washington State University to show the process through which the program evolved and to offer guidance to other institutions planning to implement similar integrated programs.

Weaving together the latest knowledge and best practices for teaching children to read, this indispensable text and professional resource provides a complete guide to differentiated instruction for diverse learners. Uniquely integrative, the book places the needs of English language learners and students with disabilities front and center instead of treating them as special topics. Accessible chapters on each of the core components of literacy clearly demonstrate how to link formal and informal assessment to evidence-based instruction. Special features include Research Briefs, Tech Tips, Internet Resources, Reflection and Action Questions, and dozens of reproducible student activities and assessment tools.

With this updated document, IRA and NCTE reaffirm their position that the primary purpose of assessment must be to improve teaching and learning for all students. Eleven core standards are presented and explained, and a helpful glossary makes this document suitable not only for educators but for parents, policymakers, school board members, and other stakeholders. Case studies of large-scale national tests and smaller scale classroom assessments (particularly in the context of RTI, or Response to Intervention) are used to highlight how assessments in use today do or do not meet the standards.

In *Antiracist Writing Assessment Ecologies*, Asao B. Inoue theorizes classroom writing assessment as a complex system that is "more than" its interconnected elements. To explain how and why antiracist work in the writing classroom is vital to literacy learning, Inoue incorporates ideas about the white racial habitus that informs dominant discourses in the academy and other contexts.

Guiding students to think of themselves and believe in themselves as writers is a goal that every teacher hopes to reach. Providing clear guidelines on helping students draft, assess, and revise their writing, the third edition of *Creating Writers Through 6-Trait Writing Assessment and Instruction* presents a highly adaptable assessment model for identifying the attributes of good writing. The focus is on assessing and revising, and this book gives explicit criteria to show students precisely what they must do to succeed. Numerous writing samples demonstrate the evolution of the writing process from draft to final version.
